

Deduct Meter Policy

It is the intent of this policy to establish the procedures and protocol for the establishment and administration of deduct meter accounts. This policy is established by the Nantucket Water Commission and administered by the Wannacomet Water Company.

Definitions

Primary Meter: The primary meter is that meter through which all water to the account flows and is measured. The primary meter is used to calculate the total water and, if applicable, wastewater charges for a defined billing period.

Deduct Meter: The deduct meter is located after the primary meter and meters water that has been measured by the Primary Meter and does not enter the municipal wastewater system. Water measured by the deduct meter is deducted from the total water measured by the Primary Meter to calculate the net sewer charge.

Policy and Procedures

1. Application for deduct meter service shall be made by the property owner or their designated agent at the offices of the Wannacomet Water Company. An application fee of \$375.00 shall be payable at the time of application. There shall be an annual service charge of \$75.00. The annual service charge shall be billed on or about July 1st of each year.
2. The Wannacomet Water Company shall provide the applicant with a meter setter at the time of application. It is the responsibility of the applicant to have the meter setter installed in accordance with the specifications of the Wannacomet Water Company.
3. Upon request of the applicant the Wannacomet Water Company shall inspect the meter setter installation and if found to be acceptable will install the water meter and activate the account.
4. Should any meter and/or its appurtenances become damaged, including any damage that may result from allowing the meter to become frozen, it shall be the responsibility of the property owner to pay for said damage. All repairs and/or replacements shall be performed by the Wannacomet Water Company. There shall be a minimum repair charge of \$50.00.
5. When the irrigation system is winterized by the property owner or their designee, the water meter shall be removed and drained of water and the meter placed in a secure location on the premises.

Revised and effective November 7, 2007
